

KAYLA GREAVU

330-739-0259 | greavukayla@gmail.com

SUMMARY

Senior Data Scientist with 12+ years of experience in predictive modeling, statistical analysis, and decision-support systems. Proven ability to translate ambiguous business problems into measurable hypotheses and deliver data-driven solutions.

Currently pursuing a Master of Science in Data Analytics (Expected May 2026) with focus on machine learning and generative AI, including LLMs, embeddings, and prompt engineering.

Expertise in Python, SQL, and data storytelling with strong experience collaborating with stakeholders to drive business outcomes.

SKILLS

Programming: Python (pandas, NumPy), SQL, R

Data Science: Machine Learning, Statistical Modeling, Forecasting, Feature Engineering

Generative AI: LLMs, Prompt Engineering, RAG Concepts, AI Workflows

Data: Data Warehousing, Data Pipelines, Data Visualization

Business: Problem Framing, Stakeholder Communication, Decision Support

PROFESSIONAL EXPERIENCE

Operations Manager – Analytics & Performance | USAF | Omaha, NE | Nov 2021 – Jun 2024

- Led analytics for a global real-time decision platform supporting 24/7 operations and 18 analysts
- Built predictive models to forecast system performance and optimize resource allocation
- Translated business problems into measurable metrics, hypotheses, and analytical frameworks
- Developed dashboards and data pipelines to monitor throughput, backlog, and system performance
- Eliminated a two-year backlog, improving turnaround time and reducing operational costs
- Partnered with stakeholders to define success metrics and evaluate performance outcomes

IT Risk Analyst / Mission Defense Team Lead | USAF | RAF Mildenhall, UK | Nov 2016 – Nov 2021

- Performed predictive risk modeling and anomaly detection across \$3B in infrastructure systems
- Developed statistical models to quantify system availability and operational risk
- Conducted feature analysis to identify root causes of system degradation
- Automated data workflows using Python and SQL, improving accuracy and efficiency
- Presented data-driven insights to leadership through visualization and reporting

Knowledge Operations Manager | USAF | Hurlburt Field, FL | Feb 2013 – Nov 2016

- Managed data governance and reporting systems supporting 12,000 users across 165 locations
- Improved data accessibility and reporting efficiency through structured analytics workflows
- Supported enterprise data migration and system optimization initiatives
- Built dashboards to improve system visibility and decision-making

PROJECTS

AI Marketing Assistant for Automotive Dealerships (Generative AI Project)

- Built a generative AI tool to automate vehicle marketing strategy and campaign generation
- Developed LLM-based workflows to extract insights from semi-structured vehicle data
- Designed prompt-engineered pipelines for content generation (affordability, lifestyle, urgency)
- Implemented hybrid AI + rule-based system for audience targeting and timing recommendations
- Created scoring model to rank vehicles based on lead potential, audience fit, and urgency
- Designed end-to-end workflow from inventory selection to campaign output

EDUCATION

Master of Science in Data Analytics — Expected May 2026 | Bellevue University

Bachelor of Science in Business Analytics — Nov 2024 | Bellevue University
